

Steven Maly, APRN, FNP-BC
Medical Informaticist

Steven Maly graduated from University of Tampa with his MSN in 2002. Between 2002 and 2005 he worked in both infectious disease and family practice before finally finding his place in Rehab Medicine. Since 2005, Steven has actively practiced physiatry in the post-acute care market in both Inpatient Rehabilitation Hospitals and Skilled Nursing Facilities.

Steven has been involved in multiple EMR implementations during his career including Advanced MD, Cerner and most recently Meditech. In his current position he worked to implement Meditech 6.15 which went live in 2018. Following completion of the project he was offered the position of Medical Informaticist. Since 2018 Steven has taken on the addition of provider ordering, electronic prescribing and documentation to the systems existing PointClickCare EMR, transitioning the Hospital EMR from Meditech 6.15 to Expanse, and implementation of a secure messaging platform. Steven is currently involved with transitioning the outpatient group's practice from ECW to Meditech Ambulatory. During all of his projects he continues to advocate for hardware, software and workflow enhancements that will help improve the provider "end user's" experience for both himself and his peers.
