### 17:00 – 19:00 **The green mobility revolution: Perspectives for cities - Joint event with Deutsche Bank, Schaeffler Group and LSE**

Cities and urban transportation account for 70% of global energy-related CO<sub>2</sub>-emissions and are among the leading contributors to climate change worldwide. Tackling this issue is critical for reaching net zero by 2050. While it is clear, that green mobility is vital to support the transformation towards climate-neutral societies, how we can achieve this in the time needed and with available resources, is a complex process with many open questions.

**Speakers:**

### 12:45 – 14:00 **Natural Capital: protecting the ocean and land biodiversity that underpins our economy**

Although the global sustainability debate is rightly focused on climate change, related issues such as biodiversity loss and ocean degradation are about to move up the agenda. In October at the biodiversity COP, governments will meet to agree on a global target for biodiversity conservation that is likely to be backed by regulation. COP26 should provide additional opportunities to shape the global debate, and at the centre of this debate will be the concept of "natural capital" – protecting species and habitats by calculating their value, not as mere commodities but as living providers of "ecosystem services".

**Keynote speech:**

[Christian Nolting](#), Chief Investment Officer and Head of Investment Solutions, Deutsche Bank Private Bank

**Speakers:**

[Markus Müller](#), Global Head CIO Office, Deutsche Bank Private Bank

[His Excellency Mohamed Nasheed](#), Former President of the Maldives

[Reinout Viersma](#), Programme Manager of Climate Adaptation, Van Oord

[Karen Sack](#), Co-Chair and Executive Director, Ocean Risk and Resilience Action Alliance

**Host and moderator:**

[Salman Mahdi](#), Vice Chairman, Deutsche Bank International Private Bank

08:45 – 10:00

**The future of ESG Bonds: Using ESG issuance to drive company transition**

ESG Bonds (Green, Social, Sustainability and Transition) have proven to be a vital tool in raising the significant capital required to support the transition to a low carbon economy, with over \$650bn of issuance expected in 2021. Deutsche Bank is a clear leader supporting clients in executing successful ESG bond programmes. In this panel we will explore how green or ESG issuances played a role in focussing the organization around decarbonisation and other sustainability objectives, and increasing transparency around ESG to investors. The panel will also explore what lies ahead for this market.

**Speakers:**

[Kaspar Jensen](#), Head of Treasury, Orsted

[Henrik Johnsson](#), Global Co-Head of Capital Markets, Deutsche Bank

[Michelle Horsfield](#), Head of Climate Sustainability Standards, Climate Bonds Initiative

[Anders Langworth](#), Head of Group Sustainability, Nordea

[Trisha Taneja](#), Head of ESG Advisory, Deutsche Bank

**Joining via live video link:**

[Jose Sainz](#), Chief Financial Officer, Iberdrola
