

Live Virtual Event

OCTOBER 16-17, 2024

Kemin Intestinal Health offers a comprehensive portfolio of high-quality and science-based nutritional ingredients to fuel the potential of livestock, poultry, and equine. Our solutions are ecologically responsible, tailored to your needs and support the immunity, gut integrity, and microbial balance of your animals.

The sixth-annual Kemin Intestinal Health Symposium will include presentations from respected industry experts across the poultry, swine, dairy, beef, and equine industries on informative topics that support the key pillars of intestinal health and provide holistic industry insights. Tune in to learn more about microbiome and stress research, the importance of water quality for animal performance, feed biosecurity as it relates to gut health, and more.

We look forward to seeing you (virtually) in October!

FEATURED EXPERTS

Dr. Jordan Gebhardt

Kansas State University

Biosecurity in Production: Impact on Animal and Gut Health

Dr. David Rosero

Iowa State University

From Weaning to Thriving: Designing Feeding and Nutrition Interventions

Dr. Todd Callaway

University of Georgia

Exploring the Microbial World: What Do We Know, What Do We Think, What Do We Hope?

Panel Discussion:

Bridging Science and Practice Through Advancement in Intestinal Health

Dr. Lautaro Cangiano

University of Wisconsin-Madison

Management Strategies to Reduce Disease Incidence in Dairy Cows During the Transition Period

Dr. Joshua Lyte

United States Department of Agriculture

The Microbiome in Livestock and Poultry: Cutting Through the Hype and Getting to Solutions

Dr. Ranga Appuhamy

Iowa State University

Water Quality and Its Impact on Animal Performance

PRESENTATION TIMES ON NEXT PAGE

This program has been approved to offer 5 CEUs to members of The American Registry of Professional Animal Scientists (ARPAS).

Kemin Intestinal Health Symposium Wednesday, October 16

9:00 - 9:15 a.m. U.S. MDT

Welcome and opening remarks

9:15 - 10:00 a.m. U.S. MDT

The Microbiome in Livestock and Poultry: Cutting Through the Hype and Getting to Solutions

Joshua Lyte

United States Department of Agriculture

10:00 - 10:45 a.m. U.S. MDT

Management Strategies to Reduce Disease Incidence in Dairy Cows During the Transition Period

Dr. Lautaro Cangiano

University of Wisconsin-Madison

10:45 - 11:15 a.m. U.S. MDT

Break

11:15 a.m. - 12:00 p.m. U.S. MDT

Drinking Water for Calves and Cows: Both Quantity and Quality Matter

Dr. Ranga Appuhamy

Iowa State University

12:00 - 12:15 p.m. U.S. MDT

Closing remarks

Kemin Intestinal Health Symposium Thursday, October 17

8:00 - 8:15 a.m. U.S. MDT

Welcome and opening remarks

8:15 - 9:00 a.m. U.S. MDT

From Weaning to Thriving: Designing Feeding and Nutrition Interventions

Dr. David Rosero

Iowa State University

9:00 - 9:45 a.m. U.S. MDT

Biosecurity in Production: Impact on Animal and Gut Health

Dr. Jordan Gebhardt

Kansas State University

9:45 - 10:15 a.m. U.S. MDT

Break

10:15 - 11:00 a.m. U.S. MDT

Exploring the Microbial World: What Do We Know, What Do We Think, What Do We Hope?

Dr. Todd Callaway

University of Georgia

11:00 a.m. - 12:00 p.m. U.S. MDT

Panel discussion & closing remarks

Bridging Science and Practice Through Advancement in Intestinal Health

PANELIST:

Dr. James Lattimer
ADM Animal Nutrition

PANELIST:

Dr. Todd Callaway
University of Georgia

PANELIST:

Dr. Petrus Poolman
Kuipers Group

MODERATOR:

Judson Vasconcelos
Strategic Technical Services and
Animal Research Lead, Kemin
Animal Nutrition & Health
